NCORP Spotlight

Top Recruiters for January:

Kansas (KS059) - 3 pts

Gulf South (LA029) - 2 pts

UPCOMING EVENTS

* URCC Mid-Year Meeting February 4, 2026

The annual Virtual Mid-Year Meeting. Come join to learn about various URCC RB studies such as ViPER.

* ViPER Webinar March 4, 2026

Join our ViPER Webinar to chat with the study team and get any clarifications! Bring your questions, or email them in advance to the study inbox.

STUDY REMINDERS & UPDATES

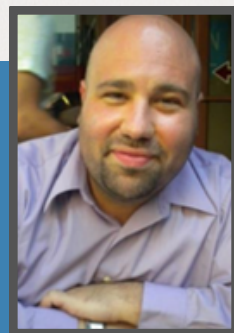

- **REDCap update:**
 - New notices were added to our Lab-follow up pages.
 - These notices are triggered by particular lab values if additional steps are required.
- **Screening Project**
 - Please enter all screened participants into the REDCap Screening Project.

Message from the PI

I am thrilled to share that we achieved our strongest accrual month to date, with 10 participants enrolled across the network. This milestone is particularly noteworthy given the significant winter weather challenges affecting many regions of the country. Despite these obstacles, our sites remained engaged, proactive, and committed to moving the study forward, and it truly shows in these results.

This success reflects the hard work and dedication of our investigators, coordinators, and clinical teams. Your continued efforts are making a meaningful impact, and this momentum puts us in a strong position as we move into the next phase of accrual.

I also want to remind everyone that the URCC Mid-Year Meeting will be held on February 4. We look forward to seeing many of you there, sharing updates, and continuing to learn from one another as we work together to advance this important study.

URCC Research Base Feature

Advarra Giftcards

* Current guidance

Advise participants to do the following:

- Review their transaction histories for fraudulent charges.
 - Submit any fraud reimbursement requests with the card company within 60 days.
- Utilize gift card funds when they are received.

* Transfer Process

If the participant's card is flagged for fraud:

- Pt must call the number on the back of the card to have their card status changed to 'lost/stolen'.
- Coordinators can then assign a new gift card.
 - Then email the study inbox for a transfer.

We are working on a solution for the gift card issues, and we thank you for your patience.

Get Involved

Interested in opening ViPER at your site? Follow the below short checklist, or reach out to the study inbox!

- ✓ Self-Train via URCC NCORP website
- ✓ Review Documents
- ✓ Procure Training Certificate
- ✓ Obtain URM REDCap Project Access
- ✓ Request Supplies
- ✓ Receive DXA & DXA Tech Certificates

Inside the Protocol

Dose Modification 101

* What triggers a Dose Modification?

- Calcium value greater than 11.5 mg/dL
- Vitamin D value greater than 90 ng/mL

Section 12.2 Dose modifications of the approved protocol – details Calcium and Vitamin D related dose modifications

Modification Walk through

- **Safety Value out of range**
 - If a safety value is out of range, per the protocol, a dose reduction will occur.
- **1st Dose Reduction**
 - Participant is instructed to take their study drug once every two weeks, we will call this **Dose B**.
 - They will need to have an additional safety check in three weeks.
- **Re-test**
 - If the participant's value normalized, they can continue with the **Dose B**.
 - If the value is still abnormal, continue to a second dose reduction.
- **2nd Dose Reduction**
 - Participant is instructed to take their study drug once every four weeks, this will be called **Dose C**.
 - They will need to have an additional safety check in three weeks.
- **2nd Re-test**
 - If the participant's value normalized, they can continue on study with **Dose C**.
 - If the value is still abnormal, the participant must be withdrawn.

Modification Decision Tree
